Do you have an adolescent aged 13-17 with Attention Deficit Hyperactivity Disorder (ADHD) or suspected ADHD?

He or she may be eligible to participate in a research study of an investigational medication at The Ohio State University Nisonger Center.

Symptoms of ADHD include disorganization, forgetting information or instructions, difficulty concentrating and trouble completing tasks on time.

Qualified participants may receive an evaluation and study medication at no cost, and may receive compensation for time and travel.

For more information without obligation, call Kristina Zottola at 614-688-3375 or email kristina.zottola@osumc.edu.
